Go GreenEOT (Energy of Things) Pvt Ltd.

2. Website

www.gogreenbov.com

3. Category of Product / Service

Energy

4. Introduction of Company / Service

Go GreenEOT (Energy of Things) Pvt Ltd. is a company that is focused on energy as a sector. Currently we are focused on increasing the uptake of electric Vehicles which helps us increase our purchasing parity of Lithium batteries, a main energy storage source. We do this by manufacturing electric vehicles, which with the increased connectivity via 4G/5G, communicate to the cloud in real time. The data that is transmitted in real time gives an insight into the way a person is riding to their destination and other parameters which help us analyze every movement of the person and package on the vehicle. This data also helps us to improve efficiency.

1. Company Name

Ourotech

2. Website

www.ourotech.ca

3. Category of Product / Service

Biotech, Health

4. Introduction of Company / Service

Ourotech is a company that is creating a universally compatible, syringe-based bioink for 3D printers and other dispensing systems. Ourotech provides a supplement to animal testing cancer drugs at a fraction of the cost using proprietary biomaterials to create engineered human tumors for drug screening. Our 3D tumor models can be used to reduce false positives during pre-clinical trials to save time and money on unnecessary clinical trials for ineffective drugs. Our biomaterials and tumor genesis protocols can be modified to mimic conditions of the human tumor microenvironment. Our flagship product, Genesis, uses shear-thinning technology to change from solid to liquid form with pressure, and to protect cells from pressure while transitioning.

[Energy, Bio, Agriculture, Wildlife Control]

1. Company Name

Clear Flight Solutions

2. Website

www.clearflightsolutions.com

3. Category of Product / Service

Wildlife hazard management

4. Introduction of Company / Service

Clear Flight Solutions is a company that creates unmanned aircraft systems and specializes in bird control and aerial inspections. We solve problems by combining the strength of nature with new technologies. Clear Flight Solutions operates on the edge of drone technology and nature. Our unique flapping wing Robirds look like and fly like real birds of prey offering services to markets suffering from large scale damages caused by birds, airports, waste management, agriculture and oil and gas industries. Our technology, knowledge and skills find cross-overs and technology spin-offs in a multitude of markets. Based on nature itself, the Robirds trigger the instinct of birds through the combination of silhouette and wing movement. Thus chasing birds becomes completely controllable. The person on the ground is always in control of what happens in the air. Two types of Robirds have been developed: A falcon and an eagle model.

Einsof Biohealth

2. Website

www.einsofbiohealth.com &
einsofbiohealth.com/speedlyte—pediatricians

3. Category of Product / Service

Biotechnology

4. Introduction of Company / Service

Einsof Biohealth is a biotechnology company that has patented the most advanced technology for rehydration worldwide. All of our current rehydration solutions are based on technology that is built for as long as 50 years. Our Encapsulated Nano Electrolytes technology is the most advanced rehydration technology worldwide. It rehydrates up to 3 times faster than current leading drinks, with 33% of intake needed and good taste. It also uses no artificial ingredients and lower levels of sugar. This technology allows our products Speedlyte and Hydralon to rehydrate their specific users faster, with lower intake and good taste.

1. Company Name

iGrow

2. Website

igrow.asia

3. Category of Product / Service

Agriculture, finance technology

4. Introduction of Company / Service

iGrow is a company that connects underemployed farmers, underutilized land, and the investors to grow an organic farm. Investors choose the seeds that they want to invest in on iGrow's website, and they can get routine updates of how their seeds grow. After the harvest time, iGrow sells the produce to the customers and shares the profit among investors and farmers. iGrow provides a web—based solution to manage any plantation in the world and has its agroforestry research facility. Our aim is to connect farmers, landowners, investors and crop buyers together to create a complete farming supply chain. They identify plants with stable demand, prices, and prospective characteristics. After that, they secure the demand with the customers and look for arable land and farmers to grow such crops. iGrow then raises capital for seeds on its platform from urban people and invests it in the chosen crops and farms.

1. Company Name

The Energy Audit srls

2. Website

www.the−energyaudit.com

3. Category of Product / Service

Software

4. Introduction of Company / Service

The Energy Audit srls is a company that develops B2B software for comprehensive energy management. Our mission is to unlock the value of companies' energy related data to help them reduce their energy consumption. Thanks to predictive modeling we can forecast the precise consumption of an asset, monitor the deviations of real consumption from what the model predicts and therefore intercept waste promptly. Our software solution is one of the few in the market that offers a global energy management system according to ISO international standards.

1. Company Name

SoundRex

2. Website

www.soundrex.com

3. Category of Product / Service

Entertainment, Technology, IoT, Hardware

4. Introduction of Company / Service

SoundRex aims to build the next generation of sound technology. We started with a mono speaker, which is just a single sound source. Then we went to stereo speakers, which are 2 speakers. In concerts, we still have mono speakers and at best stereo speakers. With SoundRex, everyone who enters the concerts gets a wearable speaker. In a concert, the audience will be hearing sound from not just two speakers but from thousands of speakers distributed all across the concert. This gives the listeners a feeling of being immersed in sound as it is coming from all directions. Also since we have control over thousands of speakers, it allows us to create completely new sound effects.

[FinTech, Information Security]

1. Company Name

DOV—E

2. Website

dov—e.com

3. Category of Product / Service

Telecommunications

4. Introduction of Company / Service

DOV—E's technology provides instant and secure wireless mobile connectivity using the always "on" audio interface. It works on any mobile and easy to use for retailers. Retailers have many platforms — in—store POS, digital screens, e—commerce websites, and ads. However, there is no single solution for user engagement which supports all mobile phones and all retail platforms. The common denominator in all of these retail platforms is — they all have speakers. DOV—E's patented technology utilizes these speakers and provides secure, quick, easy to use mobile payment and interactive mobile engagement on any platform.

1. Company Name

DarcMatter

2. Website

www.darcmatter.com

3. Category of Product / Service

FinTech (Financial Technology)

4. Introduction of Company / Service

DarcMatter utilizes technology to provide investors and asset managers with solutions for alternatives with our platform providing a completely secure engine. We ensure that asset managers remain compliant with securities regulations. The platform's algorithm-driven matching automates portfolio recommendations to investors based on their reported personal information. Asset managers can use this same algorithm to generate new investor leads. Furthermore, we facilitate cross-border investment flow and removes geographical restrictions. DarcMatter creates portfolios of top US asset managers in order to provide offshore investors with investment diversity and lower minimum requirements. For asset managers, this represents an attractive way to tap into a global investor base while benefiting from streamlined logistics and investor relations.

1. Company Name
